

TRAINING TOPICS

Anatomy & Physiology

- The Cardiovascular System
- The Digestive System
- The Endocrine System
- The Female Genitourinary System
- The Hematologic & Lymphatic Systems
- The Integumentary System
- The Male Genitourinary System
- The Musculoskeletal System
- The Nervous System
- The Renal System
- The Reproductive System
- The Respiratory System

Assessment

- Cardiovascular Assessment, O2 devices and use
- Eyes, Ears, Nose
- Head-to-Toe Assessment
- Integumentary Assessment
- Labs
- Measuring Height and Weight
- Mouth and Throat
- Musculoskeletal Assessment
- Neonatal Assessment
- Neurological/Mental Health Assessment
- Normal Heart Sounds
- Pain Assessment
- Pediatric Assessment
- Rapid Physical Assessment
- Reading an EKG
- Renal Assessment
- Respiratory Assessment
- Temperature, Pulse, Respiration
- Vital Signs

Basic Clinical Skills

- Administering the Bed Bath
- Bed Making
- Injections
- Oral Care
- Ostomy & Catheterization Basics
- Toileting & Incontinence Care

Telehealth Skills

- Remote Patient Monitoring
- Safety

Disaster Preparedness

- Preparedness
- Response

Labor and Delivery

- Postpartum Care
- Stages of Labor

Infection Control

- Creating a Sterile Field
- Infection Control Skills & Techniques
- Preventing Bloodborne Pathogen Transmission

IV Therapy

- Central Venous Catheter Management
- IV Therapy: Basics and Venipuncture

Medication Administration

- Moving and Transferring Patients
- Oral Medication Administration and Safety
- Pediatric Medication Administration
- Pharmacodynamics
- Pharmacokinetics

Respiratory Care

- Normal Breath Sounds
- Oxygen Delivery Devices

Communications Skills

- Critical Thinking
- EHR Management & Regulations
- HIPAA Regulations
- Patient Interactions and Communication
- Professional Dress and Appearance

Mission Critical Health

2023 - 2024 Produced by:
